

27th National Energy Conference “Energy & Development 2023”

Conference Agenda

- Electricity and Natural Gas Markets (prices, market operation, decarbonisation)
- Renewable Energy Sources, (High Penetration, Net-Metering, PPA's, Energy Storage, Load Discharge Management)
- Energy infrastructure – electricity transmission and distribution, natural gas transmission and storage, oil refining and marketing, hydrogen production, transmission and storage
- Energy Efficiency: Buildings, Transportation, Industry, Household Energy Conservation
- Electromobility and Electricity Grid Management
- New and Emerging Energy Technologies: Hydrogen, Biomethane, Synthetic Fuels, CCUS
- Digitilisation, Energy Software, Artificial Intelligence and Energy
- Strategic Autonomy - Geopolitics and Energy Security
- Hydrocarbon Exploration and Production (upstream)
- Energy Investment, Employment and the Economy
- Energy investment opportunities in SE Europe and involvement by Greek companies
