

## **MY THREE MESSAGES CONCERNING GAS :**

- ***At European level*** we share same goals (energy security; climate neutral economy etc.) but we have individual problems – gas is not an exception
- ***At regional level (SEE)*** – EU priorities, old/new projects and rapidly changing factual dimensions
- ***At national level (BG)*** – serious political and business hesitance due to strategic open questions and insufficient economic justification

**WRAP-UP** – *politicians to reconsider the role of gas particularly at regional level while listening to the business*

**IENE Webinar on “Gas Markets in Transition in SE Europe” – 08.06.21**
