

# Gas Infrastructures of the Future - Dioriga Gas FSRU

Nikos Satras, Head of Natural Gas Business Unit

IENE webinar on "Gas Markets in Transition in SE Europe"  
Tuesday, June 8, 2021

# Dioriga Gas FSRU

- **A new SE European natural gas gateway enhancing:**
  - Security of supply
  - Operational flexibility
  - Competitive pricing
  - Development of small-scale & bunkering LNG activities
- **Dioriga Gas offerings:**
  - LNGC berthing/ unloading
  - LNG storage/ regasification/ injection to grid
  - LNG bunkering/ bulkbreaking
  - LNG truck loading
  - Strategic positioning
- **Project status:**
  - Inclusion to the 10-yr development plan of NNGTS – ARCA
  - Commercial & regulatory development ongoing (market test in Q3 2021)
  - FEED launch, completion end 2021
  - Licensing ongoing (environmental, safety studies, installation-construction permitting)
  - Commissioning target: Q4 2023

# CNG, small-scale LNG, H2

- **Compressed Natural Gas (CNG):**

- Off-grid locations
- 1st industrial CNG application in Greece
- Compressor unit in the refinery
- Transportation by trailers & decompression at customer sites
- Well positioned to supply industries in North Peloponnese in which national grid is not present
- Future Development: supply of CNG retail stations & B2B customers

- **Small-scale Liquefied Natural Gas (ssLNG):**

- Off-grid, islands, marine fuel
- Revithoussa TLT Jan 2022
- Dioriga Gas TLT end 2023

- **Hydrogen:**

Hydrogen key lever in carbon neutral economy & integral to MOH's transition journey
